

# Art Guard®

The Next Level In Asset Protection Technology

## MAP GOLD SYSTEM: DEDICATED SECURITY FOR FINE ART & ASSETS

**A unique combination of flexibility, ease-of-use, universal coverage and affordability**

### GOLD FEATURES:

- **10-yr. history of performance:** Meets the toughest standards of high-end collectors, museums, galleries, lenders, insurers and art conservators worldwide.
- **Stand-alone:** High-end, dedicated wireless security in a plug-and-play system.
- **Easy-to-use:** Quick set up and application of up to 96 pre-enrolled sensors. Can be managed entirely from a mobile device.
- **Flexible:** Portability and communication options allow the system to conform to the needs of any facility. Monitored alerts can include, panel or remote siren, texts, push notifications, emails and phone calls to any number of people with assignable privileges.
- **Cost:** Low entry level hardware and lifetime costs with automatic software updates. No service contracts.
- **Secure:** Encrypted signal, multiple paths of communication, 24-hr. back-up battery. MAP sensors are nearly impossible to fool.
- **Comprehensive:** System covers an entire home, museum wing or gallery. Extended range with repeaters. MAP sensors can be applied to nearly any stationary object, no matter the size or configuration.
- **Complete:** Perimeter/intrusion, temp/humidity and motion sensors, as well as cameras, can be added. The system's capacity covers most homes, galleries or special exhibitions. For larger and more diverse jobs multiple systems can be employed.
- **Precise:** Digital ID gives pinpoint locations

### MAP SENSOR SPECIFICATIONS

- **Dimensions:** 2" x 2' x 1/4".
- **3 operational modes:** 2 specific magnetometer modes for hanging and seated objects and accelerometer for hanging objects.
- **Power:** 2 CR2450 Lithium coin-cell batteries with 4-5-year life.
- **Transmission:** 128-bit encrypted IP in either 433 or 345 compatible protocols
- **Range:** 400 ft. in open air. Repeaters can be added.

Art Guard's Gold System is a completely stand-alone solution for protection from theft of art and valuable assets. Ideal for private collectors' homes, where over 50% of art theft occurs, it establishes Art Guard's place in home automation with easy-to-use digital ID for any valuable stationary object, multiple paths of system communication and alerts to a mobile device. Gold offers museums, galleries and any other facility with valuable objects the flexibility and ease-of-use required for changing shows and satisfying the demands of insurers and lenders.

The Gold System delivers sophisticated, encrypted security and automation in a plug-and-play package. This eliminates the need for costly security system installations that can often mean additional equipment, wiring and multiple visits. The system is ready to install out of the box with MAP v3 sensors pre-programmed into the panel.

Art Guard's patented MAP v3 wireless sensor operates in 3 distinct modes to optimize performance for hanging and seated objects, regardless of size and configuration and in any environment. MAP protects 24/7 by simply and effectively alarming each individual asset, particularly while intrusion security is turned off to allow for daily activity in a home or institution.
